

==== Relapse Speech ====

When I came out of the parking lot, I was thinking that when Hashem makes a person sick, He wants them to realize that they're better and that Hashem is taking care of them. But when they get back not sick they're so happy that they forget about Hashem. So Hashem thinks to himself hmmm.. let me play another game on him, let me see if he really, really is still going to be bitachon when I make him better again. He wants us to be happy and He wants us to have bitachon in Hashem's stuff so that's why Hashem sometimes makes relapses. It's not a bad thing. It's just that Hashem's testing you if you really, really are bitachon. Sometimes it's really hard for you. Hashem makes different tests on you but you're still supposed to be happy because then Hashem knows you love Him, you care about it and you always listen to Him. That's why Hashem does all these stuff to you.
